machine would not start

COMPLAINT:

Backhoe came from factory and did not start, could not take off from trailer. Had to jump start.

CAUSE:

1. Engine derated due to inducement. Fault code 19060 active.

CORRECTION:

482. tried to start. turning over slowly. replace battery and check codes. have several. remove drive lines to drag off trailer. once off I reinstalled drive lines. cranked unit with back hoe boom lever pulled back and unit tried to start. did the same with the loader valve and unit started. unit has no throttle will not come off idle.

486 11/9 11/10: Troubleshoot fault code. Found fault 19060 which is upstream nox sensor timeout. Checked wiring at upstream nox sensor and found no damage. Pin 1 has 12 volts. Pin 2 is ground with less than 1 ohm resistance. 3 and 4 are can bus. 60 ohms on can bus, 2.6 and 2.3 volts. Pin 5 is also a ground with less than 1 ohm resistance. Per eTim, replaced nox sensor. Can not reset ecu data like eTim says. Fill out an assist to solve this problem. Reinstalled
